CASE NO.: 1128.006A Serial No.: 09/376,461

6193388078

May 30, 2003 Page 2 PATENT Filed: August 18, 1999

a transparent dome engageable with the flashing;

at least one skylight tube depending downwardly from the flashing, wherein the flashing comprises:

a hollow frusto-conical shaped curb defining an open top, the open top being covered by the dome, the curb defining a bottom opposite the open top; and

a skirt extending radially away from the bottom of the curb, wherein the skirt defines a radial dimension, and the skirt is formed with plural ribs, each rib being oriented radially on the skirt.

- 4. (amended) The skylight of Claim 3, wherein the skirt defines an outer periphery, and the skirt includes a rib formed along at least part of the periphery.
  - 7. (amended) A roof flashing, comprising:
    - a hollow frusto-conical shaped curb defining a bottom end; and
  - a metal skirt extending radially away from the bottom end, the skirt being formed with at least one surface strengthening anomaly, wherein the surface strengthening anomaly is a rib, the skirt defines a radial dimension, and the skirt is formed with plural ribs, each rib being oriented radially on the skirt.
- 8. (amended) The roof flashing of Claim 7, wherein the skirt defines an outer periphery, and further includes at least one rib formed along at least part of the periphery.
